

ISSA Online Roster

Teams participating in ISSA tournaments in 2020 should submit their team roster online using their QuickScores account (Go to www.quickscores.com/issa and Create Account if you have not already.) Once you log into your account on Quickscores you should be on your Dashboard. Under Coached Team's click the manage button next to your team name with the 2020 ISSA Team Rating to the right then click Manage Team Roster and fill out the initial roster form (or use the Copy Players From Old Team if you already have a roster on-line for previous years) and submit. Afterward, when coming to an ISSA tournament,

ONCE THE SCHEDULE IS POSTED

you can go to your Dashboard and under Coached Team's click the manage button next to your team name with the name of the tournament to the right and click Manage Team Roster and click on Copy Players From Old Team and move/import the roster to the event, make any additions, subtractions and add approved pick-up players and submit. Then click on the Print Waiver button and print the form which you bring to the tournament for the check-in. The players on your team can sign the Roster Waiver Form as they check-in with our tournament staff. NOTE: All managers should activate the Get Text Message button when setting up their account so they can receive messages during tournaments such as schedule changes during weather issues.
